1. Time Spent:

1. **First Section**:
   - o **Time Taken**: 2 hours
   - o **Details**: Designed the header and main content layout.

2. **Second Section**:
   - o **Time Taken**: 2 hours
   - o **Details**: Created card-style components with detailed design elements.

3. **Third Section**:
   - o **Time Taken**: 30 minutes
   - o **Details**: Focused on aligning GIFs and images properly, with minimal styling work.

4. **Fourth Section**:
   - o **Time Taken**: 2-3 hours
   - o **Details**: Built a single card design, reused for multiple cards by updating content.

5. **Fifth Section**:
   - o **Time Taken**: 1 hour
   - o **Details**: Added text over an image and created a simple footer layout.

2. Tools and Technologies Used:

- **Design**: Figma (to analyze the given design).
- **Development Tools**:
  - o **HTML5**: For webpage structure.
  - o **CSS3**: For styling, including properties for layout, gradients, and responsiveness.
  - o **Media Queries**: For making the webpage responsive.
  - o **VS Code**: As the code editor.
  - o **Browser Developer Tools**: For debugging and testing.

3. AI Plugins/Tools Used and Their Impact:

- **ChatGPT**:
  - o Consulted for specific challenges like linear gradient implementation and refining media query rules.
  - o Provided quick tips for aligning text over images efficiently.

Impact:
ChatGPT was used sparingly, primarily to verify approaches and refine specific CSS properties, which saved some time during the development process. Its role was supportive rather than central.
